Discounted Cash Flow Analysis As discussed in Chapter 7, in order to properly value a business based on cash flows, we need to first establish the appropriate cash flows to value—the unlevered free cash flow (UFCF). Once we have properly calculated UFCF we can project and discount the cash flows to present value (PV).

## **That Unveils Opportunities**

Cash flow analysis is a loose term which describes a smorgasbord of metrics that each shine a light on the liquidity of the business and – in some cases – its profitability too. One thing that every metric of this type does have in common is that it measures the movement of cash. The clue is in the title.
