Using TMS to Schedule Calls on a Content Server Cluster. Cisco TelePresence Management Suite (TMS) 12.2 or higher can be used to schedule recording calls on a cluster. We recommend that clusters use either TMS to schedule calls or ad hoc dialing. A mixture of scheduled and ad hoc dialing is not recommended.

So, given The Great Cisco Change of 2020 and The COVID, I'm a little confused. A. - Here's what I think I know: 1 - CyberOps still exists, but is an Associate's level program along with the CCNA itself and DevNet Associate? 2 - the old CCNA Security is now a CCNP level program with a core and a concentration? I understand both of these questions and I think I know the answers to them, but if I ...
