function() { ... }) will run once the entire page (images or iframes), not just the DOM, is ready.

\$(document).ready() | jQuery Learning Center

jQuery can process simple selectors of the form tag#id.class very quickly when they are used to filter delegated events.

Access Free JQuery Documentation

So, "#myForm" , "a.external" , and "button" are all fast selectors. Delegated events that use more complex selectors, particularly hierarchical ones, can be several times slower--although they are still fast enough for most applications.
