## **Engine**

The EMD 645 is a family of diesel engines that was designed and manufactured by the Electro-Motive Division of General Motors.

While the 645 series was intended primarily for locomotive, marine and stationary engine use, one 16-cylinder version powered the 33-19 "Titan" prototype haul truck designed by GM's Terex division.

The 645 series was an

large number of the diesel locomotives found in the United States. There have been three successive series in the EMD line: the 567 series, the 645 series, and the 710 series. The numbers refer to the number of cubic inches per cylinder, with a typical engine having 16 cylinders (for a total displacement on the order of 10,000 cubic inches!).

EMD, Electro Motive Division, primarily old 2 stroke diesel engines. Mostly used in trains, tug boats, power generation. Though an old engine, and old design, they are still very widely used. Most common model is the 645, all mechanical. Newer 710 models use electronic controls, but still a 2 stroke.
