Robust foundation allows investors to measure exposure to all sources of equity returns using a single global framework.

MSCI Emerging Markets Index - MSCI

The relationship between the performance of emerging market stocks and the US dollar is one of the tightest macro relationships that exists in investing. As we can see in the first chart, the relative performance of EM stocks vs the S&P 500 is highly negatively correlated with the level of the dollar. That is, when the dollar goes up, EMs underperform US large caps and when the dollar goes down they outperform.
