Hair (and a coat of hairs, called fur or pelage) is uniquely mammalian. No other creature possesses true hair, and at least some hair is found on all mammals at some time during their lives. Hairs grow out of pits in the skin called follicles.The base of the hair, sunk in the skin, is called the root, and the part that emerges to the exterior is the shaft.

ADW: Hair - Animal Diversity Web

Hair of West European Mammals. : Mammalian hair has long played a role in human society; as fur for clothing, in the production of cloth, or in the production of brushes. Scientists too make use of mammalian hair as a diagnostic tool in areas such as animal ecology, wildlife biology, and nature management. The identification of hairs found in the field, in the intestine or faeces of carnivores, or in the pellets of owls and raptors, can yield valuable information on the distribution of ...
