Heinkel 177 Greif Richard Smith

I was half-expecting the authors to rehabilitate the He 177 in this new work - according to the author of the Warpaint book the He 177 was 'designed with a touch of genius' and ruined by political interference, but no, it gets completely trashed here, Creek & Smith describing it at one point as "completely useless" - so much for German aeronautical engineering prowess, especially when compared -as the authors do over the first twenty pages- with concurrent heavy bomber developments in the ...

Comparisons with the Griehl book published by Airlife are probably inevitable... in some areas Griehl has more detail (French service) but Smith & Creek tell the story of the He 177 in a much clearer & a more 'entertaining' way. Unfortunately many of the photographs are the same in both books but reproduction is better in the Classic volume.

Heinkel He 177 Greif: Smith, J. Richard: 9781903223932

...
Smith and Creek also show how it was also limited by a number of other shortcomings, such as oscillations at high speeds and a weak wing, surprising in an aircraft that was designed from the start as a dive bomber. The use on later models of He 177 of guided anti-ship weapons such as the Fritz-X and Hs 293 is described in some detail.

The Junkers Ju 52/3m (nicknamed Tante Ju ("Aunt Ju") and Iron Annie) is a transport aircraft that was designed and manufactured by German aviation company Junkers.. Development of the Ju 52 commenced during 1930, headed by German aeronautical engineer Ernst Zindel. The aircraft's design incorporated a corrugated duralumin metal skin as a strengthening measure, which was very unusual at the time.
