If you're using Excel for Mac, in the file menu go to Tools > Excel Add-ins.

Load the Analysis ToolPak in Excel - Office Support

Microsoft Excel includes a command to import data from an Access database. You can use that command instead of the export command in Access; however, the Excel import command only allows you to import tables or queries. For more information, see the Excel Help article Connect to (import) external data. You cannot export macros or modules to Excel.
