Using Jacobson's approach of delineating across the object types (i.e. Entity, Control, and Boundary)proves the granularity required for development. With experience one may wish to add to these 3 object types, for example Event and Business\_Rule seem to be effective additions from my personal experience.

## **III, An REA Approach to Business Process Modeling**

Object-Based Approach In object-based approaches, a business object model is designed first, for example in the form of a UML class diagram. Subsequently, a business process architecture is designed by studying the business objects that exist in the organization, as well as their inter-relations.
